

### **Instructions for referee-style report**

As part of the evaluation you will be required to write a referee report on an unpublished paper related to the material in the course. Chose a paper below or come up with your own suggestion. There can be only one student writing about each paper, so papers will be allocated on a first-come-first-serve basis. If you suggest your own paper, it will need to be approved by me.

The report should:

- Be approximately 3 pages.
- Contain a summary of the main contributions and the methodologies used in the paper.
- Put the paper in the context of the existing literature and define the marginal contribution, i.e. explain clearly what is “new”.
- Assess the importance of the contribution, explain what we have learned and why or why not this is interesting.

Have fun!

Kristoffer

### **Paper suggestions**

*Higher-Order Expectations*, Golub and Morris (2017)

*Information Design: A Unified Perspective*, Bergemann and Morris (2017)

*Electoral Competition with Rationally Inattentive Voters*, Matejka and Tabellini (2016)

*Economic Agents as Imperfect Problem Solvers*, Ilut and Valchev (2017)

*Macroeconomic Analysis without the Rational Expectations Hypothesis*, Woodford (2013)

*Network Effects in Information Acquisition*, Denti (2018)

*Information-driven Business Cycles: A Primal Approach*, Chahrour and Ulbricht (2017)

*Learning from Prices: Amplification and Business Fluctuations*, Chahrour and Gaballo (2018)

*Media Competition and the Source of Disagreement*, Perego and Yuksel (2018)

*Shared Knowledge and Competition for Attention in Information Markets*, Galperti and Trevino (2018)
